

Angles of rotational symmetry

Grade 4 Geometry Worksheet

Write the angles at which each shape displays rotational symmetry.

Angle(s) of rotational symmetry:

Angle(s) of rotational symmetry:

Angle(s) of rotational symmetry:

Angle(s) of rotational symmetry:

Angle(s) of rotational symmetry:

Angle(s) of rotational symmetry:

Angle(s) of rotational symmetry:

Angle(s) of rotational symmetry:

Answers

Angle(s) of rotational symmetry:

90°, 180°, 270°

Angle(s) of rotational symmetry:

180°

Angle(s) of rotational symmetry:

none

Angle(s) of rotational symmetry:

180°

Angle(s) of rotational symmetry:

none

Angle(s) of rotational symmetry:

none

Angle(s) of rotational symmetry:

90°, 180°, 270°

Angle(s) of rotational symmetry:

60°, 120°, 180°, 240°, 300°
