

Subtract ice cream

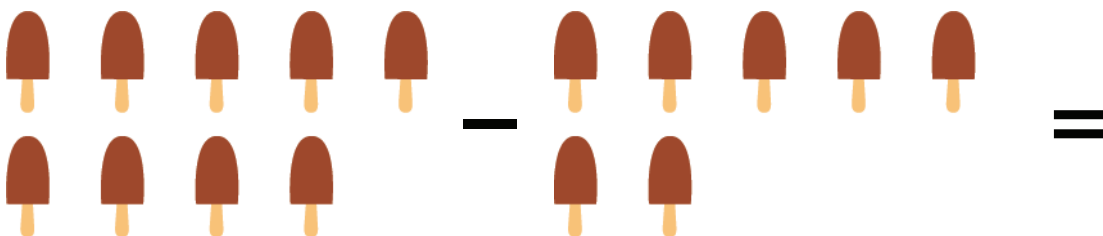

Kindergarten Subtraction Worksheet

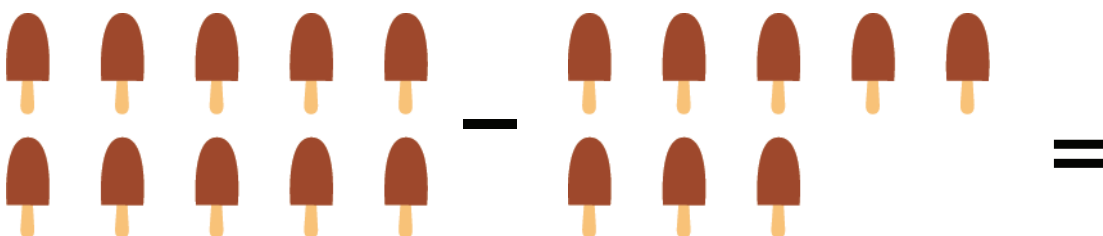

Some ice creams are taken away. Draw the ones that are left.

Subtract ice cream

Answers:

5 ice cream cones minus 2 ice cream cones equals 3 ice cream cones.

A visual subtraction problem. On the left, there are 5 brown ice cream cones with yellow sticks. A minus sign is placed between the 5th and 6th cone. To the right of the minus sign is a single brown ice cream cone. This is followed by an equals sign. To the right of the equals sign is a rounded rectangle containing 4 brown ice cream cones with yellow sticks.

8 - 5 = 3

A subtraction problem using ice cream cones. The first group has 9 cones arranged in two rows of four with one cone centered below. The second group has 5 cones in a single row. A minus sign is between them. An equals sign follows, leading to a box containing 4 cones arranged in two rows of two.
