

Dividing integers

Grade 5 Integers Worksheet

Rule:

The quotient of two numbers with same signs is a positive number.

The quotient of two numbers with different signs is a negative number.

Find the quotients.

1) $65 \div 13 =$

11) $-20 \div 20 =$

2) $-63 \div 9 =$

12) $-91 \div (-7) =$

3) $154 \div 14 =$

13) $75 \div 15 =$

4) $-175 \div 5 =$

14) $-55 \div 5 =$

5) $-198 \div 9 =$

15) $-143 \div (-11) =$

6) $-30 \div 15 =$

16) $-22 \div 11 =$

7) $240 \div 3 =$

17) $42 \div (-7) =$

8) $-108 \div (-18) =$

18) $120 \div 12 =$

9) $-228 \div (-4) =$

19) $-30 \div (-15) =$

10) $0 \div (-18) =$

20) $-239 \div 1 =$

Dividing integers

Grade 5 Integers Worksheet

Rule:

The quotient of two numbers with same signs is a positive number.

The quotient of two numbers with different signs is a negative number.

Answers:

1) $65 \div 13 = 5$

11) $-20 \div 20 = -1$

2) $-63 \div 9 = -7$

12) $-91 \div (-7) = 13$

3) $154 \div 14 = 11$

13) $75 \div 15 = 5$

4) $-175 \div 5 = -35$

14) $-55 \div 5 = -11$

5) $-198 \div 9 = -22$

15) $-143 \div (-11) = 13$

6) $-30 \div 15 = -2$

16) $-22 \div 11 = -2$

7) $240 \div 3 = 80$

17) $42 \div (-7) = -6$

8) $-108 \div (-18) = 6$

18) $120 \div 12 = 10$

9) $-228 \div (-4) = 57$

19) $-30 \div (-15) = 2$

10) $0 \div (-18) = 0$

20) $-239 \div 1 = -239$
