

Creating squares and rectangles

Grade 2 Geometry Worksheet

Find an object that you can use to trace square shapes.
(dice work well)

1) Create a rectangle that is one square high by six squares wide.

2) Create a rectangle that is two squares high by three squares wide.

3) Create a rectangle that is three squares high by two squares wide.

Do all 3 shapes have the same area? Why?

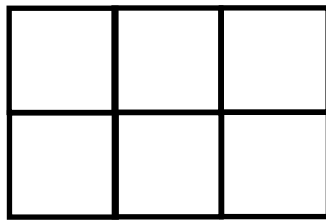

Answers

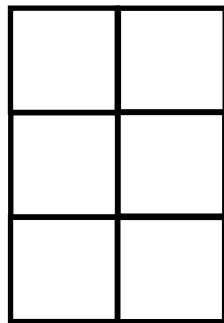

1) Create a rectangle that is one square high by six squares wide.

2) Create a rectangle that is two squares high by three squares wide.

3) Create a rectangle that is three squares high by two squares wide.

Do all 3 shapes have the same area? Why?

Yes, because they contain the same number of identical squares.
